S:=42 + 128 = 170				170					

```
Question 2
   Program exo3_2;
                                   0.5 Point
  uses wincrt;
    var x,s, z : real; n, i : integer;
    procedure pow(y:real; m:integer ; var r:real);
    var j:integer;
                                            0.5 Point
    begin
     r:=1;
     <u>for</u> j:=1 <u>to</u> m <u>do</u> r:=r*y;
    end;
                                                                                  2 Point
  Begin
     read(x, n); s := 0;
      <u>for</u> i:=1 <u>to</u> n <u>do</u>
      begin
                             0.5 Point
            pow(x, 2*i-1, z);
            s := s + z; 0.5 Point
      end;
  write(s);
End.
Question 3
  Program exo3_3;
  uses wincrt;
    var x,p: real; n, i : integer;
    function pow(y:real; m:integer) : real;
    var j:integer;
    begin
     r:=1; for j:=1 to m do r:=r*y;
     pow := r;
    end;
  function fact(m:integer) : integer;
    var j,f:integer;
                                                                                                2 Point
    <u>begin</u>
                                                                                      Soit 2 point ou ZERO
     f:=1; for j:=2 to m do f:=f*j;
     fact := f;
    end;
  Begin
     read(x, n); P := 0;
      <u>for</u> i:=0 <u>to</u> n <u>do</u>
      begin
            P := P + pow(x, 2*i+1) / fact(2*i)
      end;
  write(p);
End.
